

COMMANDS REFERENCE

Every command & shortcut, organized by importance

Sorted from most essential (learn first) to advanced (learn later). Stars = importance.

Day 1 Essentials - Learn these first		
<code>claude</code>	Start Claude Code in current directory	
<code>/help</code>	Show all available commands	
<code>/clear</code>	Wipe conversation, fresh start	
<code>/compact</code>	Compress context (use at ~80%)	
<code>/init</code>	Auto-generate CLAUDE.md from codebase	
<code>/cost</code>	Show token usage and estimated spend	
<code>/status</code>	Show context %, auth, session info	
<code>/exit</code>	Quit Claude Code session	
Day 1 Shortcuts		
<code>Shift+Tab</code>	Cycle: Normal > Auto-accept > Plan	
<code>Ctrl+C</code>	Cancel current Claude response	
<code>@file.ts</code>	Add specific file to context	
<code>\+Enter</code>	New line in prompt (multi-line)	
<code>Ctrl+G</code>	Open prompt in external editor	
<code># note</code>	Quick add to CLAUDE.md memory	
First Week - Daily workflow		
<code>/model</code>	Switch model (opus/sonnet/haiku)	
<code>/model sonnet</code>	Use Sonnet (fast, 80% of tasks)	
<code>/model opus</code>	Use Opus (complex reasoning)	
<code>/undo</code>	Roll back Claude's last change	
<code>/diff</code>	Interactive diff viewer (review changes)	
<code>/plan</code>	Enter plan mode (think first)	
<code>/fast</code>	Speed-optimized mode (same model)	
<code>/fork</code>	Clone conversation to experiment	
<code>/btw</code>	Side question without touching context	
<code>/config</code>	Open settings panel	
First Week Shortcuts		
<code>Option+P</code>	Quick model picker	<code>Alt+P (Win)</code>
<code>Option+T</code>	Toggle extended thinking	<code>Alt+T (Win)</code>
<code>Ctrl+F</code>	Kill all background agents	
<code>Tab</code>	Toggle thinking mode on/off	
<code>Esc Esc</code>	Open rewind menu	
<code>/vim</code>	Enable vim keyboardings in prompt	
Second Week - Power user		
<code>/permissions</code>	View/edit tool permissions	
<code>/hooks</code>	Configure hooks interactively	
<code>/mcp</code>	Manage MCP server connections	
<code>/doctor</code>	Run diagnostics (debug issues)	
<code>/batch</code>	Parallel execution on worktrees	
<code>/simplify</code>	3-agent parallel code review	
<code>/review</code>	(deprecated -> use /simplify)	
<code>/debug</code>	Debug current issue	
<code>/loop</code>	Iterative refinement cycle	
<code>/rc</code>	Remote control (control from phone)	
<code>/keybindings</code>	Edit custom keyboard shortcuts	
Second Week Shortcuts		
<code>Ctrl+R</code>	Search conversation history	
<code>Ctrl+A / E</code>	Jump to start / end of line	
<code>Ctrl+U</code>	Clear entire line	
<code>Ctrl+W</code>	Delete word backward	
<code>Ctrl+K</code>	Delete to end of line	
<code>Option+B / F</code>	Move word backward / forward	
<code>! command</code>	Direct bash execution from prompt	
Advanced - Configuration & automation		
<code>/agents</code>	Create/manage subagents	
<code>/install-github-app</code>	Auto-review PRs on GitHub	
<code>/login</code>	Re-authenticate with Claude	
<code>/insights</code>	View usage analytics	
<code>/terminal-setup</code>	Configure terminal for Claude Code	
<code>/rename</code>	Rename current conversation	
CLI Flags - Launch options		
<code>claude -p "text"</code>	Non-interactive (run & exit)	
<code>--model opus</code>	Set model at launch	
<code>--resume</code>	Continue last session	
<code>--continue</code>	Continue specific session	
<code>--worktree</code>	Isolated git worktree	
<code>--tmux</code>	Launch in tmux session	
<code>--debug</code>	Verbose hook/tool logging	
<code>--mcp-debug</code>	Debug MCP server connections	
<code>--add-dir PATH</code>	Add extra directory to context	
<code>--max-turns N</code>	Limit turns (non-interactive)	
<code>--output-format</code>	json or text output	
<code>--dangerously-skip-permissions</code>	Auto-accept all permissions (use with caution!)	
Bundled Skills - Ship with Claude Code		
<code>/btw</code>	Side question mid-response	
<code>/claude-api</code>	Help with Anthropic API usage	
<code>/debug</code>	Debug current issue	
<code>/loop</code>	Iterative refinement	
<code>/simplify</code>	3-agent parallel code review	
Context Management Tips		
<code>/compact keep X</code>	Compress but keep topic X	
<code>/clear</code>	Switch tasks completely	
<code>/status</code>	Check context % usage	
<code>@file</code>	Add file to context	
<code>/cost</code>	Check token usage & spend	
<code>!tokens</code>	Debug: inspect token breakdown	
Advanced Tips & Tricks		
<code>ultrathink</code>	Force Opus 4.6 high effort mode	
<code>HANDOFF.md</code>	Multi-session work continuity	
<code>/diff</code>	Review all changes before committing	
<code>/fork</code>	Safe experiments (original untouched)	
<code># quick note</code>	Instant CLAUDE.md memory add	
<code>! ls -la</code>	Direct bash from Claude prompt	
<code>/rc</code>	Control session from your phone	
<code>/batch</code>	Parallel work across worktrees	
Permission Modes (Shift+Tab)		
<code>Normal</code>	Ask before each tool use	
<code>Auto-accept</code>	Allow all tool use	
<code>Plan</code>	Claude explains plan, you approve	
Exit Code Semantics (for Hooks)		
<code>Exit 0</code>	Allow the operation	
<code>Exit 1</code>	Warning (non-blocking)	
<code>Exit 2</code>	BLOCK the operation
